Package... Altogether Better

SILENT SIMPLICITY JUST FOR YOU

Easy to keep clean, silent and simple, a Bubble Stove will bring to you warming and comforting pleasure. Enhance your leisure time and free yourself from the dust and dirt normally associated with solid fuel appliances. On cold winter nights it will thrill and delight as you watch an uninterrupted view of the most realistic coal effect yet achieved on an oil stove. Bubble Stove can bring real benefits to you and the new extended range means that there is now a stove to cover all your heating requirements.

FEATURES

- Small and compact oil stove.
- High water content boilers for use on gravity or fully pumped systems.
- Heat up to 75 cubic metres of space.
- Burns kerosene or diesel, (Specify on ordering).
- Runs with or without a coal fired effect kit.
- Quick and easy manual ignition through a conveniently placed lighting port without the need to remove the coal kit or pot inners.
- Glow plug, electric ignition at 230 volts a.c. (Optional)
- High quality components and castings.

DIMENSIONS & SPECIFICATIONS

|------------------------------------|----------------------------------|
| Width | 410mm |
| Depth | 428mm |
| Height | 503mm |
| Output | 5Kw |
| See Price List for detailed Output | |
| Flue Out | 100mm Dia. |
| Weight | 40 to 50 Kilos (Model Dependant) |

SILENT SIMPLICITY JUST FOR YOU

The corner oil and solid fuel stoves have been designed specifically for use in confined spaces. The triangular shape makes it suitable for fitting into corner locations. The stove can be supplied as a water heater with a fully integral high output boiler for both corner and solid fuel, as well as just a room heater. When fitted into a corner location, the door is always facing the available space, adding a further advantage to the designer's options.

SOLID FUEL FEATURES

- Fully adjustable door hinges and locks.
- Stay cool easy to use door handle.
- Stainless steel grate carrier, front fret and grate. The high chrome content of the stainless steel grate gives a much longer life.
- Deep ash pan, capable of holding 24 hours of burnt ash.
- Deep combustion chamber capable of holding a large fuel load.
- Three separate controlled air routes into the stove.
- Built-in heat shields to reduce radiation.

OIL FEATURES

- Stay cool easy to use door handle.
- Fully adjustable door hinges and locks.
- Built-in heat shields to reduce side radiation on dry stoves.
- Built-in boiler temperature control and safety cut-out thermostat.
- Built-in fiddle rail.
- Easy access controls.
- Easy access lighting.
- Integrated oil control valve.
