The Schiedel Isokern Garden Fireplace is the ideal solution for outdoor living.

This stunning focal point for any garden is available in 3 sizes and is delivered in a complete packaged solution.

The natural volcanic pumice (sourced from the Hekla Volcano in Iceland) gives this outdoor fireplace all the insulation needed to have a safe and spectacular centre-piece in any garden. The relatively small footprint also means that it can be placed against any wall, even in small gardens or yards, where space is at a premium.

The kit includes the chimney blocks, the lip glue for assembly, firebricks and also firebrick mortar and a render to either seal the joints or give an entire rendered finish.

The Garden 500 model comes with a log retainer and barbecue grill (additional log stores are available as extra). The 950 and 1200 models can have a log store and a barbecue grill as an additional extra.

This makes the Garden Fireplace the only choice for outdoor heating and living, from the leading experts in chimney solutions.

500 MODEL

Our most popular model as it can function in any size garden.

The 500 model comes with a FREE Log Retainer and a Grill to allow it to become a superb barbecue, as well as a stunning Garden Fireplace.

Additional chimney blocks can be added to increase the height.
