

RANGEmaster

UNRIVALLED PERFORMANCE

Why choose Rangemaster?

With a Rangemaster at the heart of the kitchen, the kitchen is always the heart of the home. That's why you'll find a Rangemaster in more homes than any other range cooker. So, why buy a Rangemaster? If being Britain's No.1 range cooker manufacturer isn't reason enough, read on to find out why we're in more homes than any other.

01

Style and choice.

We offer the biggest range of style, size and fuel types making it easy for you to find the perfect Rangemaster for your kitchen.

02

A family of over 1 million owners.

When you buy a Rangemaster, you're joining our family. Today, much has changed at Rangemaster but our principle of creating, beautiful, functional, market leading appliances built by hand in Royal Leamington Spa continues to underline our success.

03

The right ingredients.

It can take weeks to carefully craft a Rangemaster. The highest gauge steel is pressed, cut, washed, polished, and finally enamelled with Endurance finish. The frame is triple folded, creating a unique encasement for some of the highest quality components you'll find.

04

Quality and testing.

We test, re-test and test again, refining our products to offer the best results; we are passionate and proud of making the finest quality range cookers on the market.

05

When it comes to cooking; experience matters.

There's over 185 years of manufacturing excellence at our factory in Royal Leamington Spa. Generations of local families have all played their part in making Rangemaster the success it is today. Our people are passionate and proud of making the best Range cookers on the market. We call it... **Built from experience**

Which fuel type?

DUAL FUEL

Dual Fuel offers the responsiveness of a gas hob, with the flexibility and even heat distribution of an electric oven. Our gas hobs come with up to six powerful burners with cast iron pan supports. A variety of sizes accommodate a range of different sized pots and pans, from small omelette pans to large boilers for moules or soups. There's a multi-ring burner for high-heat cooking, perfect for stir-fries and on selected models there's also a wok cradle and ridged griddle or Teppanyaki for extra cooking flexibility. If you want gas but don't have access to a mains supply, all of our dual fuel appliances can be converted to LPG using a kit that is fitted at point of installation by a specialist gas installer.

ALL GAS (LPG convertible at point of order*)

Roasting with gas creates a moist atmosphere, helping to prevent your food from drying out whilst cooking. Our 90cm and 100cm ovens offer the best of both worlds, with a gas oven and one tall electric fan oven.

INDUCTION MK1**

Our standard induction hob has five cooking zones with nine power settings. As it's the pan that heats up and not the hob, induction is safe, controllable, instant, precise and energy efficient. Added benefits include low temperature settings for melting chocolate or a slow simmer along with power boost, residual heat indicator and child lock for peace of mind for families with young children. All feature electric ovens.

INDUCTION MK2**

Taking induction a step further, our Induction system MK2 is available on an exclusive selection of range cookers. Low temperature settings can be held for two hours until the hob switches itself off, perfect for keeping food warm. There's also a bridging zone with two large cooking areas can be used independently or together for griddles, fish kettles or a collection of pans. Along with power boost, pan detection and boil dry protection, we've also developed an induction compatible griddle. All feature electric ovens.

CERAMIC

For those who prefer ceramic, our classic ceramic hotplates come with up to six cooking zones to accommodate different sized pans. Added features include hot hob indicators for safety and an easy wipe-clean, seamless surface. All ceramic versions host electric ovens.

*Available on selected models only.

**People with cardiac pacemakers or implanted insulin pumps must make sure that their implants are not affected by the induction hob (The frequency range of the induction hob is 20-60kHz)

SPECIALIST features

* Not all features are included on every model. Please refer to product specifications.

GRIDDLE

Made from robust cast aluminium, the griddle plate sits snugly on top of the gas hob, when required. The flat plate is ideal for cooking bacon and French toast, while the grooved plate provides fat drainage, offering a healthier way to sear steaks, burgers and fish.

TEPPANYAKI GRIDDLE

Whether you're feeding the family or entertaining friends, our handy Warming Zone will keep food warm prior to serving. Perfect for sauces, starters and soups, it reaches a maximum temperature of up to 70°C.

RAPID RESPONSE™

Rapid Response™ pre-heats the oven 30% faster than a fan oven, so you don't waste time waiting for the temperature light to go out before you can get cooking. Our tests show that you can place chilled foods in a cold oven, select Rapid Response, and get the same results as starting with a pre-heated oven.

MULTI-ZONE

Choose between two ceramic 1.1kW cooking zones, or slot a durable non-stick griddle plate over the top to provide a healthy cooking surface.

MULTI-RING BURNER

Create authentic Asian cuisine on our Multi-ring burner, which can hold a specially designed wok cradle.

PYROLYTIC CLEANING

Turn the oven to this function and it literally cleans itself. The oven will heat up to 450°C, once it reaches this temperature, the oven carbonises all cooking residue to a fine ash; at the end of the cycle all that is left to do is simply wipe away the ash with a damp cloth.

GLIDE-OUT GRILL™

Includes a two-way trivet for two grilling depth options. Positioned on smooth-action telescopic runners, our Glide-out Grill™ does exactly that. Not only is it easier to check up on your food as it's grilling, but it's also safer as it reduces the risk of pulling the grill out too far.

BREAD PROVING DRAWER

Our bread proving drawer is a unique feature to range cooking, enabling you to rest and rise your dough before baking.

FOUR-WAY GRILL TRIVET

The improved grill offers even more cooking flexibility and capacity thanks to its deeper pan design. It also includes a four-way trivet for four grilling depth options to suit every type of dish.

LARGE OVEN CAPACITY

With a main fan oven of 79L the Rangemaster oven leads the way for size and performance. A rated across the board and ultra fast pre-heating with Rapid Response™ make Rangemaster ovens the largest and most efficient available.

Making your choice...

Whether you want a traditional style or the clean, sophisticated lines of something a little more contemporary, a Rangemaster range cooker will become the cornerstone of your kitchen. Distinctive, efficient, highly versatile and made to our exacting standards, every Rangemaster is designed to make cooking a pleasure, not a chore.

- LED lighting
- Four drawer and two shelf freezer compartments
- Holiday and Eco Modes
- Super Freeze and Super Cool Modes
- Child Lock

Dark Inox

even **circ** RANGE**fresh**
preserver

VSEAL™

Located on the exterior of the left door, this feature draws air from a specialised reusable vacuum bag before then using heat to seal the bag shut. Vacuum sealing the bag dramatically limits air reaching foods, enabling them to stay fresher for longer.

Additionally, the vacuum-sealed food can be used for sous vide cooking, which has many benefits, including retention of flavour, better textures and healthier results. Each SXS Deluxe includes 30 reusable vacuum bags.

Freezer drawer - Independently controlled freezer zones

A must-have addition to any kitchen design, a wine cabinet is the perfect solution to keeping white, rose or red wine at their optimum temperature. Whether it's for a summer barbecue in the garden or entertaining family and friends at the weekend, having a dedicated wine cabinet is the ultimate finishing touch to any kitchen appliance collection.

The new 30cm and 60cm undercounter models offer an array of features and functions with dual temperature zones for storing different wines in the same unit.
