FIRENZA

PLANCHA BARBECUE COLLECTION

THE DRAGONFLY EXPERIENCE...

At Dragonfly, our goal is to offer the pinnacle of outdoor living. With our designer portfolio created for inclusive open air cooking, we're transforming outside spaces into stylish centres for social occasions.

Straight from rural Italy, the Firenze is the essence of finding joy in the simple things in life. Built for a collective food experience, the Firenze reinvents al fresco time with family and friends.

All-Weather Protection

Protect your plancha plate from the elements with ease with one of our rainproof covers. We recommend storing both our solid oak rings and grill attachments indoors when not in use. However, Large Wooden Ring Covers are also available, which accommodate the rings and are suitable for shorter periods and moderate climates.

“ Do you remember those summer evenings out on the terrace? How we'd laugh and eat together around the fire... ”

Corrosion-Resistant Steels

The Firenze's fire bowl is made from Nero black powder-coated steel. Its plinth base comes in either Nero black powder-coated steel or Corten steel depending on model. These materials are extremely resistant to corrosion. With the grill and solid oak ring removed, and appropriate steps having been taken to protect the plancha plate, the Firenze can be left outdoors for extensive periods without weathering.

REDEFINING AL FRESCO

Optional Solid Oak Ring

The solid oak ring is a stunning accessory that transforms your Firenza into a social dining space. Gather your friends to cook, eat and drink together, sat around the fire!

Circumferent Air Flow

Featuring an elevated plancha plate, the Firenza's innovative design results in an optimised air current around its circumference. Combustion air is drawn in from beneath the plate, right to the flames!

Sleek Plinth Base

Contemporary and practical, choose from bases with and without integrated log storage.

Optional Grill

The Firenza's grill attachment offers tantalising cooking options. Chargrill delicious vegetables, toast fresh ciabatta, or flame-grill a juicy steak for flavours that only come from cooking over live fire!

Concave Plancha Plate

Our 10mm plancha plates are precision-pressed to be subtly concave, helping to channel any excess fats into your fire bowl.

Elliptical Cooking Control

The Firenza's plancha plate is also elliptical. This shaping results in greater variation in temperature across the surface, offering a more controlled cooking experience. To whip up a seafood frenzy, try flash-frying fillets of succulent sea bass at the centre of the plate, while gently searing melt-in-the-mouth lobster tails around its edge!

Important Information

The protective layer of corrosion on Corten bases of the Firenza will only be partially developed upon delivery. During the first 3-6 months, while this protective layer finishes developing, Corten corrosion may leave stains on skin, clothing, and surfaces.

In cases where the Firenza is set up on wooden or composite decking, we suggest covering the surface with a non-combustible material.

Note that all steel surfaces of the Firenza – particularly the plancha plate and fire bowl – become extremely hot during operation. Additionally, our optional solid oak rings are designed for dining and light food preparation; they are not built to bear loads exceeding 7.5kg. Please take additional care in the presence of children and pets.

Due to variation in lighting and printing inks, finishes illustrated may differ slightly from actual models.
