

Trouble Shooting

Problem	Probable causes	Corrective action
Fire difficult to start Fire goes out	Wood green, too damp or poor quality	- Use the recommended fuel
	Logs are too big	- To light the fire, use small, very dry twigs. To maintain the fire, use split logs
	Air starvation	- Open lower spin wheel and top air control lever
	Insufficient draught	- Check that the flue is not obstructed, sweep it if necessary - Seek advice from a chimney specialist
Fire burns too quickly	Too much draught	- Ensure that the lower spin wheel is closed - Partially close the top air control lever
	Excessive draw	- Install a draught stabiliser. Consult your Dealer
	Poor quality wood	- Do not continuously burn small wood, sticks, bundles, carpentry offcuts (plywood, pallets), etc.
Smokes when lighting up	Flue duct is cold	Burn paper and kindling wood to increase heat
	Room is in decompression	- In houses equipped with mechanical ventilation, partly open a window until the fire is well established
Smokes while burning	Draught is insufficient	- Consult a chimney specialist. - Check that the flue is not obstructed, sweep if necessary
	Down draught	- Install an anti-down draught cowl. Consult your Dealer.
	Room is in decompression	- In houses equipped with CMV, an outside air intake must be installed for the chimney
Low heat output	Incorrect Fuels	- Use the recommended fuel

4. List of components

When ordering spare parts, specify the stove type and serial number, including the colour index (on the guarantee

or identification plate), the name of the part and the part number.

Example : "Lorraine MF" stove, model **121 13 01 L**, cast top plate **302108-77**

Y = 121 13 01 Y ; L = 121 13 01 L ; K = 121 13 01 K

N°	Code	Description	Type	Qty	Y	L	K
