

Country cooking comes of age

BOSKY

COAL/WOOD CENTRAL HEATING COOKERS

20

The new **BOSKY 20** is a coal/wood central heating cooker, which allows you to cook beautifully, heats up to five radiators and domestic water. Built to exacting standards of efficiency and flexibility, the **BOSKY 20** has many outstanding and convenient features to make life easier.

The Firebox is capacious and has a riddling grate for effective combustion of coal, wood and smokeless fuels.

The Firegrate has two positions, which are controlled quickly and easily by a release handle. The top position concentrates the heat onto the hotplates and into the ovens; the bottom position brings the fire into contact with the water jacket and produces hot water for the central heating system and the water tank.

The Stainless Steel Heat Exchanger wraps right round the fire in the bottom grate position to provide hot water efficiently just where it is required.

The High Heat Output of 28,000 Btu/hr with either coal, wood or smokeless fuel gives central heating for up to 5 radiators.

The Two Large Ovens with enamelled lining and adjustable shelves give ample cooking space; the top oven, with double glazed door for even baking, is large enough for a 24lb turkey, the lower oven will slow cook casseroles.

The Full Size Hotplate forms the entire top surface, so lots of pans can be used at the same time.

The Additional Electric Oven Element in the top oven is a unique BOSKY feature and guarantees oven temperatures even when the fire is out.

The Automatic Thermostat controls the fire and responds to heat from either the oven or from the water jacket.

The Insulation Shielding to the back and sides and a hinged insulated cover over the hotplate provide maximum heat retention.

The Cast Iron Flue Box controls chimney draughts and allows easy access for chimney sweeping.

Modern design with primary and secondary combustion and long flue passages to ensure the highest efficiency, which will significantly reduce fuel requirements and costs.

Add to this a host of other features:

- Thermometer for both water and oven temperatures.
- Huge ashpan
- Front or top loading
- Oven by-pass and starter flap
- Adjustable oven shelves and roasting pan
- Designed to fit standard kitchen units
- Enamel finish in White or Caramel

The BOSKY 20 is the world's most modern central heating cooker which will carry country cooking into the 21st century

Specification	BOSKY 20
Maximum heat output	28,000 Btu/hr.
Dimensions (W×D×H)	33½" × 24" × 33"
Oven Sizes	
main oven (W×D×H)	14" × 18" × 13"
lower oven (W×D×H)	14" × 21" × 10"
Hotplate size (W×D)	30" × 20"
Electric oven heating	2 kw
Flue draught control box	Included
Flue pipe diameter	6" i.d. insulated flue
Thermostatic control of burning	Included
Two thermostat censor positions	Included
Insulated covers	Included
Vitreous enamel finish – colours	White, Caramel
Heat exchanger	Stainless steel for direct or indirect water circulation
Riddling grate	Included
Maximum log length	17"
Fuels	Wood, coal and/or smokeless fuel
Oven by-pass and starter flap	Included

Dimensions and specifications are approximate and we reserve the right to change them at any time.

The **BOSKY** range of cookers and boilers.

- BOSKY 10** For cooking with wood
- BOSKY 20** For cooking (additional electric element in the oven), domestic hot water and up to 5 radiators
- BOSKY 60** For cooking (additional electric element in the oven), domestic hot water and up to 11 radiators.
- BOSKY 65** With hotplate, domestic hot water and up to 12 radiators
- BOSKY 90** For cooking (additional electric element in the oven), domestic hot water and up to 14 radiators.
- BOSKY 95** With hotplate, domestic hot water and up to 15 radiators.
