

On Monday morning, the fire brigade complete with tender arrived at the show and not wanting to miss a trick the Bubble Stove team, who were exhibiting close to them saw an excellent opportunity by inviting a fire officer to test his thermal imaging camera on their live display of oil and wood fired, stoves and cookers.

The fire brigade duly obliged and checked out each of the under fire appliances with excellent results. Chimney flues, flue guards and appliance surround temperatures were accurately checked resulting in all

Bubble Stoves design targets being met, great display by the fire brigade and useful, accurate information for the Bubble team.
